

Water Sector Communication, Knowledge Management and Research

Project Title	Water Sector Communication, Knowledge Management and Research
Project Summary	Work with USAID's Water Office Communication and Knowledge Management (CKM) project to increase water sector program communication, knowledge sharing, and learning, as we seek to improve access to safe and adequate water supply and sanitation and manage water resources to enhance food security.
Country	United States

Project Description

Water is essential for human health, food security, energy, and resilience in the face of climate change. Living without reliable access to safe and sufficient water puts millions of people globally at risk of illness, lost income, and undernourishment.

To support efforts to increase sustainable access to improved water and sanitation, USAID's Water Office seeks an intern to support communication, knowledge management, and research activities, including:

- Write blogs, conduct research, and contribute content for Globalwaters.org
- Support social media outreach efforts
- Build up water sector photo collection
- Assist with publication and website writing and/or copy editing

Required Skills or Interests

Skill(s)

Editing and proofreading

Research

Social media management

Storytelling/blogging/vlogging

Writing

Additional Information

You will part of a team of two interns. The other will support Water Sector Research and Data Analysis
